

Christmas Creativity Pack

Make a beautiful wintery centrepiece for your home...

Let's get creative Sheffield! Follow these instructions to make a beautiful wintery centrepiece. When you are done you could turn on your candle and put it in your windowsill to show others or put it on a table in your home. You might even want to give it as a gift.

You'll need a glass jar, an LED light and materials from your home and garden!

- 1) Place your LED candle inside your jar.
- 2) If you have a paper and pen, draw a design for what you would like your wintery centrepiece to look like.

Have fun scavenging for materials you could use from around your house and/or garden too.

Our volunteers that tried this last year came up with a few ideas including; cotton wool for snow, using holly or rosemary, using cut-outs from old Christmas cards, painting the outside of the jar with a silhouette of a wintery scene, using a photograph of a loved one and also adding some wintery scents with things like cinnamon, vanilla or pot pourri.

- 3) Using the ribbons, pine cones, berries and wooden shapes provided and any of your own materials, decorate your centrepiece.
- 4) On a recycled card or envelope, write a message for somebody else, with something you have enjoyed this year or one thing you look forward to in 2022.
- 5) Fasten your gift tag around the neck of the jar.
- 6) Finally, choose a home for your wonderful wintery centrepiece. Enjoy!

If you'd like to share a photo of your creation with us, we'd love to see it. You can share on our social media with #IgniteImaginations or email us a picture to enquiries@igniteimaginations.org.uk and we'll add your picture to our gallery.
